

Special issue call for papers from Business Systems Research: Green Enterprise: Sustainable Business Models and Innovation

CALL FOR PAPERS

Business Systems Journal (BSR) is an **international scientific journal** focused on **improving competitiveness of business and economics** through the **novel operations research** approaches such as **modeling approach, statistical analysis, machine learning**. BSR examines a wide variety of business and economics decisions, processes and activities within the actual business setting, but within the systems and modeling approach framework. This special issue seeks theoretical, analytical, empirical, critical and comparative studies that discuss, but are not limited to, the following topics: Green Business, Human Capital Development and Capacity Building, Green Startups, Eco-Entrepreneurship, Corporate Social Responsibility, Ethics and Green Business, Green Information Systems, Green Marketing, Triple Bottom line framework, Green Alliances, Green Business Models, Co-Creation and Social Innovation.

A special issue of the **Business Systems Research Journal** with extended versions of selected papers from **ICRIT'18 (The 2nd International Conference of Research in Innovation and Technology, Tehran)** will be published under the journal's publishing standards. Special issue is **scheduled** for publication in **September 2019 (Vol. 9 No. 1)**. The deadline for submission is **15/11/2018**.

AUTHOR GUIDELINES: <http://www.bsjournal.org/author-guidelines.html>

If papers have already been presented at the conference, the authors should change the title, the abstract and at least 30% of the paper text, so that the paper can be treated as a completely new paper.
