## AUTHOR GUIDELINES

### EDITORIAL POLICY

AD-minister seeks to disseminate research on local and international developments in Management, International Business, Accounting, Marketing and Organizational Psychology.

AD-minister is a biannual publication and manuscripts may be submitted at any time. Manuscripts for publication in AD-minister must be submitted in accordance with the Author guidelines (<http://www.eafit.edu.co/ad-minister>).

AD-minister uses the *Turnitin* software to detect instances of overlapping and similar text in submitted manuscripts and adheres to COPE and Elsevier guidelines on publication ethics in order to avoid misconduct in publishing, to adopt streamlined procedures for correction and retraction, all of which ensure readers that each published paper has met all quality criteria.

The opinions of the authors are theirs alone. They do not necessarily reflect those of the University, the Business School or the Editorial Committee. AD-minister is an open access journal, Creative Commons Attribution BY.

### SUBMISSIONS

**AD-minister** has a fully web based system for the receipt, review, correction and publication of manuscripts through the Open Journal System platform (<http://www.eafit.edu.co/ad-minister>). Authors should bear in mind the following when making submissions to the journal:

- Articles must not be simultaneously submitted to other journals;
- Submission for the evaluation process does not guarantee publication or inclusion in a specific edition of the journal.

### Statement of original work

Once the Editorial Committee decides to send an article for peer review, the corresponding author(s) will be required to sign a statement which, among other things, certifies that the text submitted is original work, and permits its publication.

Coauthors must agree upon the order of listed authors. For acknowledgement of authorship, **AD-minister** adheres to the standard of the International Committee of Medical Journal Editors (ICMJE-Vancouver).

### Regarding content

Articles should be written in the third person singular. They should be free of spelling and grammar errors. Clear content and form will lend academic rigor and credibility to manuscripts and allow readers to better assimilate the ideas exposed.

Manuscripts should adhere to the following basic structure:

**Title** – Subtitle (if any) in Spanish and English.

Authors should provide their **institutional/ research affiliation** (Faculty, School, Department, Institute etc.), along with institutional e-mail address, city and country.

**Abstracts** – no more than 12 lines, in English and in Spanish. The abstract may be structured in one of the following ways: 1) subject-objective-thesis-conclusions-sources used, 2) type of method proposed/evaluated /discussed, characteristics of the proposed method, range of applicability and performance of the method , or 3) introduction, method, results, discussion, and conclusion.

List of **key words** in Spanish and English to facilitate the classification of the article;

Two or three **JEL codes** (See [http://www.aeaweb.org/jel/jel\\_class\\_system.php](http://www.aeaweb.org/jel/jel_class_system.php)).

If the article contains **photographs, graphics or other images**, high-quality original files should be attached to the submission.

**Mathematical equations** should be in Arial 10 points; formulas in Word format (Microsoft Equation Editor 3.0).

The **Conclusions** section should set out the general merits of the article and indicate possible future lines of research.

If the article has an **Acknowledgements** section, it should accurately state names of people, institutions and/or firms collaborating in the preparation of the study. If the article is part of a broader research project carried out by a group in an institution, then appropriate information should also be provided.

### Length

Articles should on average be 15-30 letter-size (8.5 by 11 inches (215.9 mm × 279.4 mm) pages, in 10-point Arial in length. However, academic quality will in all cases come before length when determining suitability for publication in the journal.

### Citations and references
